

Ronald Sin . Jarvis Consulting

I am currently a Jarvis consultant who graduated from Ontario Tech University with a Computer Science Co-op Bachelors of Science. During my co-op I worked at Code Ninjas as a black box tester for an in-house web tool with a small team of developers, as well a Computer Science Educator for children aged 5-15. What drew me into data engineering is my love for solving puzzles. Planning and building data pipelines, turning noisy data into clean predictable data, feels like a big puzzle and is very satisfying when everything comes together.

Skills

Proficient: Python, Linux/Bash, RDBMS/SQL, Agile/Scrum, Git

Competent: Java, JavaScript, C#, NumPy, Flutter

Familiar: Dart, Unity, HTML, CSS, React

Jarvis Projects

Project source code: https://github.com/jarviscanada/jarvis_data_eng_RonaldSin

Cluster Monitor [GitHub]: Created and deployed Bash scripts and a Docker contained PostgreSQL database to regularly monitor and collect hardware and usage data about a Linux Rocky virtual machine.

Core Java Apps [GitHub]:

- Twitter App: Curabitur laoreet tristique leo, eget suscipit nisi. Sed in sodales ex. Maecenas vitae tincidunt dui, et eleifend quam.
- JDBC App: Curabitur laoreet tristique leo, eget suscipit nisi. Sed in sodales ex. Maecenas vitae tincidunt dui, et eleifend quam.
- Grep App: Curabitur laoreet tristique leo, eget suscipit nisi. Sed in sodales ex. Maecenas vitae tincidunt dui, et eleifend quam.

Springboot App [GitHub]: Not Started

Python Data Analytics [GitHub]: Not Started

Hadoop [GitHub]: Not Started

Spark [GitHub]: Not Started

Cloud/DevOps [GitHub]: Not Started

Highlighted Projects

Image Filter and Effects App [GitHub]: Utilized various computer photography algorithms and techniques to create a GUI tool to select and replace colour in an image. Implemented features such as upscaling and zooming into an image without loss of pixels with 2D linear interpolation, and selecting a colour and sensitivity from an image to replace with another colour with NumPy and SciPy.

Hospital Staffing Level AI Prediction tool [GitHub]: Led a team of 3 developers to successful create a Granite AI-powered tool to solve staffing issues in a medical setting, reducing average simulated wait times by 25% while under a time constraint of a 48 hour Hackathon.

Professional Experiences

Data Engineer, Jarvis (2026-present): Undergoing training at Jarvis. Completed Linux and SQL modules.

Black Box Tester, Code Ninjas (2022): Developed over 100 black box test cases for an in-house booking web-tool, ensuring 100% accuracy to all test cases. Maintained over 25 computer workstations, contributing to near 100% uptime of facility hardware and software. Managed a team of over 20 employees, across two locations.

Education

University of Ontario Institute of Technology (Ontario Tech University) (2019-2024), Bachelor of Science, Computer Science Co-op

Miscellaneous

- Band Member (Guitar)
- Motorcycle Riding
- Bouldering
- Volleyball Player
